Instruction Manual

MXR4-100TX Network Switch

INSTALLATION AND OPERATION INSTRUCTIONS

INTRODUCTION

Thank you for purchasing your American Fibertek MXR4-100TX series network switch. Please take a few minutes to read these installation instructions in order to obtain the maximum performance from this product.

FUNCTIONAL DESCRIPTION

The MXR4-100TX series combines four copper Ethernet ports. MXR4-100TX units allow transmission speeds of 10 Mb/s or 100 Mb/s on each of the copper ports. Refer to the data sheets for detailed performance specifications.

The MXR4-100TX series is configured to auto negotiate the data ports to either 10Base-T or 100Base-TX Ethernet data at full or half duplex. The auto negotiate feature also selects the proper MDI or MDIX interface.

This unit is contained in a compact and rugged aluminum housing with internal dc voltage regulation. The detachable terminal block, RJ45 Ethernet data connector, and LED indicators provide for easy installation and monitoring of data and dc power. The MXR4-100TX is designed for rack mounting in the MXRC-1 subrack. For mounting as a modular stand alone unit see the MX4 series.

INSTALLATION

THIS INSTALLATION SHOULD BE MADE BY A QUALIFIED SERVICE PERSON AND SHOULD CONFORM TO THE NATIONAL ELECTRICAL CODE, ANSI/NFPA 70 AND LOCAL CODES.

MXR4 series units slide into any open slot in the MXRC-1 subrack. Use a small screwdriver to screw the top and bottom fasteners into place.

MXR4-100TX

MXR4 SERIES POWER SOURCE

Power to MXR4 series units is supplied by the subrack. Please refer to the MXRC-1 and MXRCPS-1 instructions for further details.

MXR4 SERIES POWER CONNECTION

Power is supplied to the MXR4 series units via a four finger backplane connector. The MXR4 series units can be inserted into the subrack or removed from the subrack with power applied to the backplane.

MXR4 SERIES DATA CONNECTIONS

The UTP Ethernet input/output connections are made via RJ45 plugs on the front of the unit. A maximum CAT5 wire length of 100 meters is permitted.

MXR4-100TX STATUS INDICATORS

The MXR4-100TX series units provide the following LED status indicators to aid in troubleshooting:

PWR

A green LED indicator monitors the presence of DC power into the unit. Power status associated with this LED is summarized below.

PWR Indicator:	Power Status:
Green	Input Power at Correct Level
Off	Check Input Power

LINK/ACT

A Green LED indicator monitors the connection and data flow on each of the four copper ports. Port status associated with this LED is summarized below:

LINK/ACT Indicator:	Port Status:
Solid Green	Port Connected
Flashing Green	Port Communicating
Off	No Data Flow

SPD

A bi-colored LED indicator monitors the speed of the data flow on each of the four copper ports. Data status associated with this LED is summarized below:

SPD Indicator:	Port Status:
Green	Port Connected and in 100 Mbps Mode
Amber	Port Connected and in 10 Mbps Mode
Off	No Data Flow

<p style="text-align: center;">This unit complies with 21 CFR 1040.10 and 1040.11</p>
