Minimum - Pentium 4, 1 GHz

Memory:
Disk 2 MB
RAM 6 MB

ORDERING INFORMATION:

AFI2089

This product is sold as licensed software for use on a single computer. Use contingent upon acceptance of license agreement and activation via the internet.

The American Fibertek AFI-2089 Executive Keyboard program emulates all user functions of the American Dynamics AD2089 physical keyboard. The software may be installed for a single use 30 day trial per computer, after which a license must be purchased.

The program is easily installed and activated over the internet. Simply select the connection type and obtain full control with a computer desktop presentation of a physical keyboard.

The same controls and functions to which users are accustomed are then available through mouse clicks or through "keystrokes". i.e.: 'M' for Monitor and 'C' for Camera. Every 'push button' on the screen has a computer key emulated including number keypad arrow keys for Pan/Tilt and +/- or mouse wheel for zoom.
